Changes of French policies on energy savings and the development of renewable energy resources

From October 1st, the French National Assembly will start discussing the major adjustments to energy policies which, according to the minister, aim to fight against global warming and reduce French energy bills.

The Dods Trombinoscope French monitoring team has created a summary of the proposed bill and feedback from key stakeholders in the field of environment, energy and transport.

Contact us to receive your complimentary copy of the briefing and to find out more about our French monitoring service.
